

S-C RECONSTRUCTION RECORD

One-page application record for Forming Claims in Evidence Synthesis

Template version: 1.0

Record DOI: [DOI]

REVIEW DETAILS

Review citation / DOI:

Review or synthesis question relevant to this record:

Last search date, if reported:

Record prepared by:

Date prepared:

Use:

- ☐ Review authoring
- ☐ Peer review
- ☐ Downstream reconstruction

1. MATERIAL CONCLUSION (C)

Exact conclusion:

Source location:

(section / page / paragraph / table / figure / URL as applicable)

2. SUPPORTING SYNTHESIS FINDING(S) (S)

Smallest sufficient completed synthesis finding(s):

Source location(s):

Relevant qualification, uncertainty, certainty or confidence:

3. $S \rightarrow C$ COMPARISON

Does accepting C require accepting substantive content beyond S?

☐ No ☐ Yes ☐ Uncertain

If Yes or Uncertain, state the smallest additional proposition:

If No, but a proposition expressed in both S and C remains disputed,
state that proposition:

4. CLAIM TRACE

Complete one row for each additional or disputed proposition requiring scrutiny.

| Additional / disputed proposition | First point of entry + source location | Evidence, reasoning or established method relevant to appraisal; record where appraisal has already occurred | Action on C* |

-----	-----	-----
-----	-----	-----

*Action on C:

Retain / Retain and clarify basis / Narrow or revise / Separate

If the disputed proposition entered before C, record above where appraisal returns. This does not create a fifth conclusion-level action.

5. STOPPING / ROUTING NOTE

If no further conclusion-level appraisal is required, state why:

If further appraisal is required, identify where it belongs:

6. ALTERNATIVE PAIRING OR UNRESOLVED AMBIGUITY

Complete only if another consequential S–C pairing remains plausible:

Alternative S–C pairing / unresolved issue:

Would using the alternative materially change the reconstruction?

☐ No ☐ Yes ☐ Uncertain

Associated method:
